

TABLE PAD

INNOVEE HOME

BEST WAY TO CLEAN

The vinyl top can be wiped clean with regular dishwashing soap and water. Never use harsh cleaners as these products have chemicals that might disintegrate the vinyl.

PROPER STORAGE

Store the table pad in its original storage bag and keep it flat to prevent from deforming. Should be kept at a constant temperature, away from moist areas and direct sunlight.

PROTECT YOUR TABLE

Table pads are the perfect way to protect your table against heat from hot dishes and pots or unexpected messy spills that can destroy the beautiful finish of your table.

HELPFUL TIPS

- Wipe up spills as soon as they occur to prevent the cover from being stained.
 - Do not expose Table Pad to direct sunlight.
 - Take your Table Pad off at least once or twice a month in order to let your table breathe. For best results we suggest to leave the Table Pad off overnight.
 - Dust your table first with a dry clean rag before sliding your pad on in order to maintain the cleanliness at the bottom of the pad.
- PRECAUTION:** For dishes that came directly from the oven, we strongly recommend that you use a trivet as it might damage the vinyl part of your table pad.
